## Important Safety Information

**IMPORTANT:** Non-observance of these manual can result in serious injury or damage to the device.

Read this instruction manual carefully, in particular the safety instructions, before you begin using the device, and keep the instruction manual for future use. If you pass the device on to a third party, be sure to pass on this manual too.

**Warning:** These warning notices must be observed in order to prevent any injury to the user or to third parties.

In different countries, different regulations may apply to the use of mobile phones (e.g. when driving, in hospitals, at petrol stations, in aircrafts). Note the laws for using a mobile phone in your country, and turn the device off when usage is not permitted, or when dangerous situations or interference could occur.

Only use the device in accordance with its purpose, and only at locations where telephoning poses no dangers.

Only use the manufacturer's power supply and battery. Inserting an unsuitable battery, or inserting the battery incorrectly, can result in the danger of explosion. The battery must not be opened or exposed to a flame.

The operation of medical devices can be affected. The manufacturers of pacemakers recommend a minimum distance of 20 cm between the devices when the mobile phone is switched on. Do not carry the phone in your breast pocket.

If you suspect that there has been interference between the phone and a medical device, please consult your doctor before using the phone again.

Make sure than small children do not play with the packaging material (danger of suffocation). The device and its accessories may contain small parts that can be ingested. Special care is needed if the device is to be used in the vicinity of small children or sick or disabled people. Keep the phone out of reach of such persons. Do not leave the device unattended when it is connected to the mains power supply.

**Caution:** Alerts you to possible damage to the device or other objects.

Your mobile phone is suitable for hearing aids. However, if some hearing aids produce a buzzing noise, contact your hearing aid specialist.

Do not expose the device to moisture, or to extreme heat (strong, direct sunlight) or cold (permafrost). Do not drop the device, and avoid jolting, shocks and pressure.

The phone must only be opened to replace the battery or the SIM card. Any other changes made to the device are not permitted and result in the loss

of the operating license and the guarantee.

The phone can cause interference in the vicinity of televisions, radios and other electronic devices.

## 2.0 Before Operation

### 2.1 Scope of Delivery

1 Mobile phone

1 Battery

1 Power supply unit. Input: AC 100-240 V, 50/60 Hz, 200 mA Output: DC 5 V, 800 mA

1 Charging station

1 USB Earsphone

1 USB cable

1 Operating manual

### 2.2 Information on Disposal

Packaging is reusable, or can be recycled. Please correctly dispose of packaging material no longer required. Should you detect any transportation damage when unpacking the device, please contact your dealer immediately.

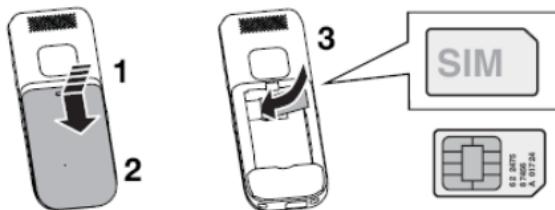

This device may not be disposed of along with household refuse! Every consumer is obliged to deposit all electrical or electronic devices, no matter whether they contain harmful substances or not, at a collection point in his/ her town or with a commercial dealer, so that it can be disposed of in an

environmentally-friendly way.

Remove the battery before disposing of the device. Do not throw used batteries into the household refuse; put them in with special waste or in a collection station in a specialist shop. If you have any questions about disposal, contact your local authority or your dealer.

### 3.1

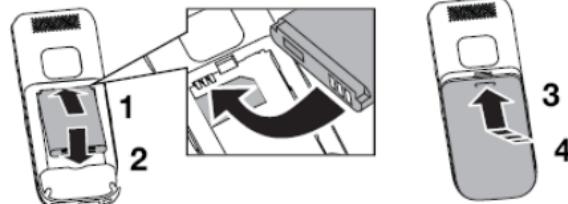

#### Inserting the SIM Card

---

### 3.2

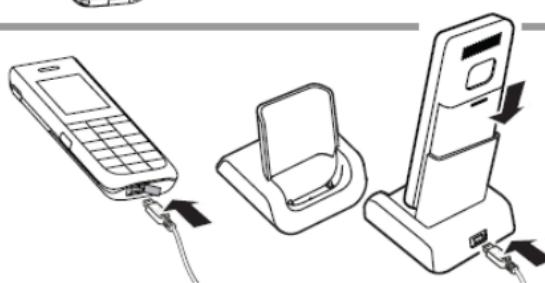

#### Inserting the Battery

---

### 3.3

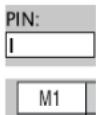

#### Charging the Mobile Phone

### 3.4 Switch the Device On

Press and hold down until the device switches on

Enter the PIN of the SIM card

Confirm PIN OK = device is ready for use

**NOTE:** When insert SIM card in the phone and switch on, following the welcome screen, there will come out a menu for language setting, English, Spanish, French, German, Italian, Dutch and Portuguese for selection.

### 3.5 Switch the Device Off

Press and hold down until the device switches off

### 3.6 Display Symbols

	Battery Display		SMS Received
	Signal Strength		Muting
	Alarm Switched On		Silent
	Headset Plugged In		Ringtone Switched On
	Key Lock On		Vibration Only
	Foreign Network		Vibration Then Ring
	Call Transfer Active		Vibration and Ring
	Call Missed		

## Making Phone Calls

### 4.1 Accepting a Call

-  Press to accept a call
-  Press to end a call or to reject an incoming call

## 4.2 Making a Call

Enter the desired phone number with the area code

Press to delete the last number

Press and hold down to delete all numbers

Press to dial the number displayed

Press to end the call or to interrupt the dialing

## 4.3 Making a Call with Directing Dialing

Press and hold down direct dialing key M1, M2 or M3 until the corresponding number stored is called

Press to end the call

NOTE: Setting phone numbers for direct dialing keys – see section 7.2

## 4.4 Making a Call with the Phonebook

Press to open „Main menu“

Press to find „Phonebook“

 Press to open „Phonebook“

 Press to open „Search“

 Press until the desired phone number appears

 Press to dial the phone number displayed

 Press to end the call or to close the phonebook

#### 4.5 Calling Names (A-Z) from the Phonebook (Quick Search)

 Press to open “Search”

 **6**<sub>MNO</sub> Enter the first letters for the person you want to call.

 E.g. Press key **6** once for **M**  
Key **3** twice for **E**

 Key **9** three times for **Y**  
Until the name MEYER is displayed with its phone number

 Press to dial the phone number displayed

 Press to end the call or to close the phonebook

## 4.6 Redialing

-  Press to open the call logs
-  Press until the desired phone number is selected
-  Press to dial the phone number displayed
-  Press to end the call or to close the call list

## 4.7 Making an Emergency Call

Press the SOS call key on the back of the device and push it firmly upwards to trigger the emergency call.

The emergency call begins after a delay of 5 seconds. In this time you can prevent a possible false alarm by pushing the emergency call key back down again. Your mobile phone dials in sequence the three emergency call numbers saved until the call is accepted.

Before the call, the phone will send a SOS message to each SOS numbers. After the call, the phone will alarm a ringtone to mention the user push down the SOS call key.

**NOTE:** Save up to three emergency phone numbers that will be dialed in sequence in the case of an emergency, see section 7.4.

## 4.8 Ending the Emergency Call Mode

Press the SOS call key and push it downwards

## 4.9 Listening and Key Tone Volume

Press during a phone call to increase or decrease the listening volume. Press in idle mode to adjust the Key Tone Volume.

**⚠** Never hold the mobile phone to your ear when it is ringing or when an emergency call has been triggered. This could damage your hearing.

(14 cents/minute from the German Telekom landline network,  
charges from mobile networks can differ)

In guarantee cases, send the device to our Service Team along with a description of the error and proof of purchase. If devices are sent in for repair without proof of purchase, repairs can only be carried out against pay-

ment. This also applies to devices that are not packaged sufficiently. We reserve the right to make formal changes towards improving and developing the product further. © International Brand Distribution GmbH 07/2009

The Auro Classical 8510 mobile phone complies with EU directive R&TTE. It also complies with the European Electromagnetic Compatibility (EMC) and Product Safety Directive. Thus, the Auro Classical 8510 carries the CE marking. You can view the conformity declaration and certificates for permission to operate and registration at [www.branddistribution.de](http://www.branddistribution.de).
